Year 1 are continuing to produce their own paper by recycling unwanted bits. This week we will be searching for leaves and petals to add.

Year 2 have used unwanted packaging to make the 'form' of the letters that spell out 'RECYCLE'. Here they are working together to put the finishing touches to the letter Y.

Year 3 have begun a new unit which looks at the natural and man-made landscape around Suzhou. This week we used Suzhou silk to stitch traditional Chinese pavilions for our landscape.

Year 4 have been trying to learn to draw in different ways using their feet and mouths. Just like any form of learning, the more they practiced the better they got! Great control, Shawn!

Year 5 finished their stitching project by designing and sewing sunshine badges to link with their next unit on energy.

Year 6 take a well earned break at camp after finishing their amazing exhibition t-shirts. A big 'well done'!

Year 7 are in the process of making a 3D representational design of their badges as a symbol of their identity. This has involved some skilled cutting with craft knives and much patience.

Year 8 and 9 have been using their wooden blocks to make a series of prints to represent 'shapes and patterns in our natural world'. Yi mixed just the 3 primary colours and white ink to make a great range for her prints.

Year 10 and 11 have begun to work onto an EtonHouse t-shirt with pen, acrylic paint and fabric to recreate their idea of 'sadness'. They have learnt a new skill, fusing fabric with a soldering iron, which several of them have used to great effect.
