

Year One Dragonflies

In Our Unit of Inquiry, Sharing the Planet, we made three dimensional dioramas of our local environment.

As well, we have learned about the importance of plants and trees in our environment. We planted bean plants. We watched them grow, and wrote our observations in a daily plant journal. We measured our plants with a centimeter ruler.

Last Friday, at assembly, Dragonflies presented a Reader's Theatre on stage. They read Goldilocks and the Three Bears with much expression, and were proud of their accomplishments.

In Math we have been doing lead-up activities to multiplication. We have used manipulatives to show groups of objects. Then we drew examples such as "3 groups of 2" to demonstrate our understanding. Finally, we counted the number of objects to know how many in total.

We enjoyed learning about the process of drawing and cartooning. Our Year 6 Learning Buddies assisted us in completing our own cartoon. It was so much fun!
