

YEAR 7 CLASS NEWSLETTER

IN OUR CLASS...

Happy June and welcome to the final month of school! It has been quite busy the past couple weeks, with finishing various studies, preparing for tests and speeches, and getting used to study timetables. This is the first year for our students to experience final exams. They will take 3 exams on Monday and Tuesday: English, Maths and Mandarin. They have been working on the study skills that are required for this type of exam process so we look forward to seeing the results which come from their hard efforts. Good luck with your final studies over the weekend!

Yours sincerely,
Irawan Gani

UPCOMING EVENTS

June 11th: Sports Day

June 14-15th: MYP Exams

**June 16th: School closed –
Dragon boat Holiday**

**June 25th: Water Fun Day
and Talent Show**

MATHEMATICS

The class performed admirably in their recent Mathematics test on fractions. This concludes the formal assessment in Mathematics for the year. Next week the students will sit a Mathematics test on the entire year's work. This will not be a summative piece of assessment, nonetheless the students have been studying hard for it.

Tory Mills

ENGLISH

Everybody has now finished their speech and they did a great job improving their oral skills, connecting to the topic of energy sources! This is a challenging task for those that are newer to English so everyone should be proud of their efforts. Well done! Also, students have been learning how to reference which will help them in all subjects for years to come.

Students have been working hard to prepare their informative speeches. They have been given an outline format as well as reviewing possible attention-getters. I am very impressed with both their outlining and bibliography writing! Everyone has spoken and generally they did a great job sharing their information in an interesting way for their rapt audience. Well done with this difficult task!

SCIENCE

The students have prepared & presented their speech on alternative energy sources.

HUMANITIES

We are continuing our final unit about the changing environments. The focus is on ecosystems, what they are, and how they are impacted by humans, etc. As they have finished researching their ecosystems, students are completing their lyrics for their own song about ecosystems. I look forward to hearing all creations!
